

DescendState::on\_update

LandState::on\_update

MissionNode::get\_status  
\_monitor

```
graph LR; A[DescendState::on_update] --> C[MissionNode::get_status_monitor]; B[LandState::on_update] --> C;
```

The diagram illustrates a dependency or data flow. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'DescendState::on\_update' and the bottom box contains 'LandState::on\_update'. On the right, there is a single gray rectangular box containing the text 'MissionNode::get\_status\_monitor' on two lines. Two blue arrows originate from the right side of the white boxes and point towards the left side of the gray box, indicating that both state update functions feed into or are processed by the mission node's status monitor.
